Contents

1 Introduction

The goal of these documents is to provide a baseline foundation for the Windows team members. Please update and improve the documentation wherever you see fit.

I think there are 5 categories to cover:

1. Deployment to Proxmox

2. Setup of Active Directory

3. Setup of the CA

4. Setup of the DFS / highly available files

5. Hardening

6. Planning (for the competition, timelines)

7. Offense (to practice)

Each category has an associated folder

This is my knowledge of Windows. I have tried to include everything I think could be useful to you. I encourage you to do the same, add more sections and flesh out the sections with your own experience.
